

Affordable Care Act (ACA) Administration

ACA Administration with WEX minimizes your risk and keeps you in compliance.

Partnering with us is the easiest way to reduce your workload and protect your organization from costly mistakes. We've designed our ACA services to be as simple and efficient as possible.

Pick from two levels of service:

Comprehensive

Our comprehensive option has everything you need to meet your employer-shared responsibility obligations, including:

- Monthly and lookback measurement methods
- Full-time and part-time tracking and affordability determinations
- Automated 1095-C code generation and code review assistance
- Printing and mailing 1095-C forms
- Preparing and filing electronic IRS-AIR-A2A 1094-C forms

Reporting only

Our reporting-only option is perfect for employers who only need help with ACA reporting requirements:

- Automated 1095-C code generation and code review assistance
- Printing and mailing 1095-C forms
- Preparing and filing electronic IRS-AIR-A2A 1094-C forms

State Coverage Mandates

Several states (CA, MA, NJ, RI and the District of Columbia) now require residents to have insurance just like the federal ACA program. Employers and health plans are required to report health coverage information to these states.

Easy data transfer

No one makes it easier to transfer data. Your IT team doesn't have to program to our specs — we'll even accept multiple files from different systems or files from other vendors.

**Ready to simplify
ACA administration?**
